

"BY IMPLEMENTING REASONABLE AND SOUND ENERGY EFFICIENCY PROJECTS, THE CITY HAS SAVED MORE THAN TWO MILLION DOLLARS FROM AVOIDED ENERGY COSTS, PNM REBATES AND REDUCED OPERATING COSTS."

"RATHER THAN SIMPLY TALKING ABOUT RECYCLING, WE HAVE MADE SIGNIFICANT STRIDES WITH A NEW PUBLIC-PRIVATE Partnership on a state of the art recycling program."

Under Mayor Berry's administration the City has completed **80 energy efficiency projects** — implemented **8.6 million dollars** — and received **160 thousand dollars** in PNM Rebates.

We estimate these projects have a total avoided energy cost savings of **nearly one million dollars** to date. We estimate these projects have a total maintenance and operating savings of an additional **one million dollars** to date.

These projects will have continued annual savings with pay-back periods of less than five to ten years.

Previous to 2010, the City had only completed **17 energy projects** for a sum total of **2.4 million dollars** that had a savings of less than **700 thousand dollars**.

Under Mayor Berry's administration, we have completed nearly five times more energy efficiency projects than prior to 2010...

...and implemented over three times the funding on energy efficiency projects...

\$\$\$\$
\$\$\$\$\$\$\$\$\$\$
\$\$\$\$\$\$\$\$\$\$
<b>2003 - 2009</b> \$2.4 MILLION

...the City has saved three times the dollars in avoided costs and received nearly ten times more dollars in PNM rebates.

**This translates to** reducing the City's carbon footprint (CO2 emissions) by more than **6,800 metric tons** for electricity saved and **290 metric tons** for natural gas saved during Mayor Berry's Administration. *That's equivalent to...* 

...or planting **174,907 trees** from electricity saved and **7,483 trees** from natural gas saved

...or taking more than 1,421 cars off the road from eletricity saved and 61 cars off the road from natural gas saved

CARBON FOOTPRINT CALCULATOR FROM http://www.epa.gov/cleanenergy/energy-resources/calculator.html#results

Under Mayor Berry's administration, the residential recycling program has grown more than 17 times larger. The initial pilot program of 10,000 bins will be increased to 178,500 bins city-wide by the end of 2013. With the new recycling center, the City's goal will be to divert 4 times as much material away from the landfill than the City has ever done before.
